Irresistibly Unica

We've taken the highly successful Unica design and given it a remarkable makeover. We found out just what electricians, designers and their customers wanted, and created new colors and materials to fit with any décor. New Unica features innovative functions to carry the range into the smart homes of the future. Welcome to the new Unica – irresistible, beautiful, and innovative.

Irresistibly beautiful new designs

Unica includes a suite of new designs, colors and materials. As well as standard white, there's now dark anthracite, soft beige, aluminium, plus a wide range of modern colors to suit any interior design beautifully. For the more design oriented, new Unica also includes textures of real glass, stone, wood and metals.

Irresistibly simple

Clever design innovation makes the Unica range easy to install – something any electrician will appreciate. We've thought of everything from modular installation and scalable solutions, to backwards compatibility with the original Unica range.

Irresistibly future-proof

Innovative and intuitive technology makes Unica a scalable range that offers Bluetooth capability, Wiser home automation and even KNX connectivity – so homes, offices and commercial buildings can now be future-ready.

Homes and commercial

Unica is designed to provide homes, offices and commercial buildings with one unified range. The perfect match for all installations.

Simplicity

Unica features ingenious design elements, so it's easy to install.

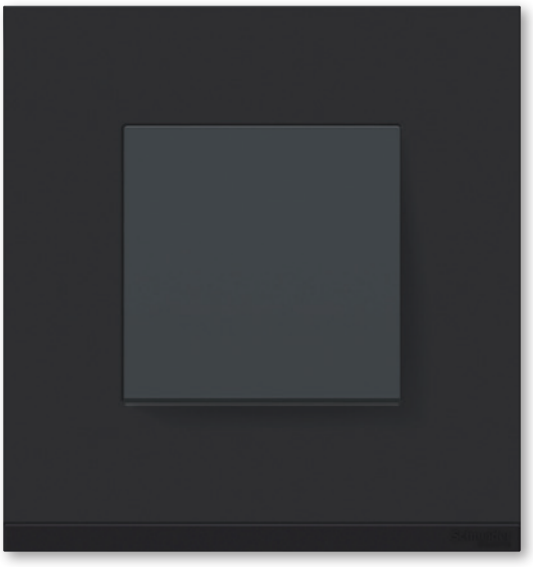
Irresistibly beautiful

Beautifully crafted with the latest and future trends in mind, the new Unica range is sure to turn heads in any home or commercial building.

Two beautiful new designs

The new Unica range includes two frame designs: Unica Studio and Unica Pure. Unica Studio comes in three formats: Studio, Studio Color, and Studio Metal. Unica Pure adds a touch of elegance with real materials: glass, stone, wood and metal.

Unica Studio

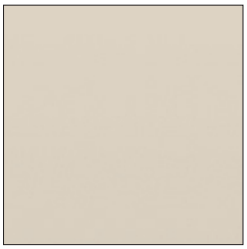


Unica Pure

Four insert colors

Unica allows you to combine each frame with the four insert colors available: white, beige, anthracite, and aluminium.

white



beige

anthracite

aluminium

Unica Studio

Unica Studio offers one modern shape, combined with three different material options, and numerous, modern and appealing colors and textures to satisfy every style and taste – Studio, Studio Color, and Studio Metal.

Timeless design

Unica Studio features a square frame with smooth, rounded corners and a large square switch. They are available in four classical colors: white, beige, anthracite, and aluminium. The balance of form and function is sublime with timeless design that blends perfectly with both modern and traditional interiors.

Perfect match

Unica comes in many color combinations to match any décor style.

Modern style

Let color define your customers' personalities. Bring life to living spaces with Unica Studio Color frames. Available in seven colors, there's a hue to match any décor and any furniture.

Elegant finishes

Unica Studio Metal offers elegant metal finishes in five exclusive colors for stylish environments and a discreet look. You can feel the quality through delicate textures and tones designed to bestow an air of sophistication in any setting.

Studio

The foundational range of Unica is Studio. White and beige are ideally suited to blend with lighter wall colors, while anthracite and aluminium are perfect accents for darker colors, creating warm, welcoming environments.

Unica Studio white

Unica Studio

Irresistibly simple

The entire new Unica range has been designed to be simple and easy to install, with one offer for both homes and commercial applications. It is backwards compatible, and is infinitely scalable for easy planning and flexibility.

Easy installation

Unica features uniquely designed fixing frames, and modular switches and sockets to greatly simplify things for the electrician. The new design makes for simple, fast, and flexible installs. Easy-to-access release buttons, screwless socket-outlet terminals and extra space for wiring are just a few of the clever innovations. The modular approach offers a wide range of functions and new possibilities.

Easy clipping

The new size of Unica inserts allows for direct clipping to the trunking for even quicker and easier installation. This major simplification means one insert type can now be used for both homes and commercial buildings.

Backwards compatibility

Because Unica has long been a popular choice for homes and buildings throughout Europe, it was vitally important that the new range be backwards compatible. That's why we designed new Unica to easily integrate with legacy installations where necessary.

> “One of the most important features we instilled in Unica is ingenuity so the electrician could install more devices faster through simplicity of design.”

Frédéric Beuvry
SVP Industrial Design & Ergonomics

Installation simplified

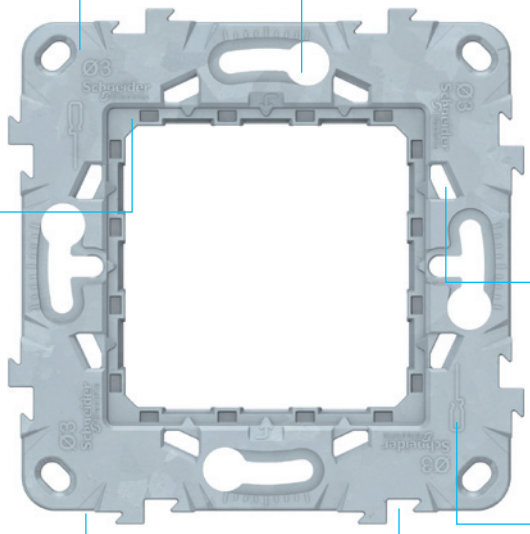
For electricians, efficiency is maximized with speed, ease, and flexible installation, which has everything to do with the simplicity of the system. That's why we designed Unica with clever features to be modular, very easy to understand, and super-quick to install.

Fixing frames

Flexible installation
Installation flexibility thanks to symmetric fixing frame sides.

Secure fixing
Finer tolerance between fixing frame and insert. Less dangling, the insert sits securely in the fixing frame.

Robust design
The new Unica fixing frame is bigger and more rigid due to the smaller 40 x 40 mm insert window. This provides extra strength to the frame to help prevent distortion from fastening the clips.

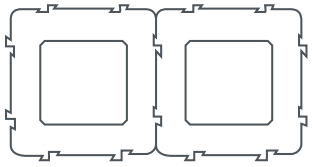


Easy adjustment
The screw slots allow rotation of the insert in either direction to correct installation boxes that have been misaligned. These slots are a perfect fit for flush mounted box standard screws, so fixing is now even easier and even more secure.

Stronger connection
Finer tolerances between the fixing frame and cover create a stronger connection for a more reliable installation.

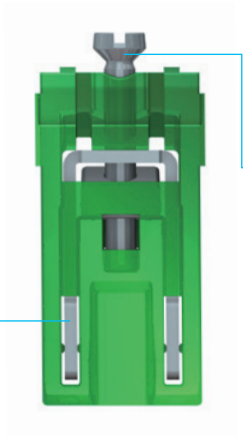
Intuitive design
Intuitive design of slots on the front and back of the fixing frame for screwdriver to remove the insert without marking the product. It also avoids injuries when the screwdriver is placed in the wrong position. Inserts can be removed easily from the front and back.

Perfect alignment
When you install two or more products in a multi-gang frame, it is important that the inserts are aligned. Unica's interlocking system avoids misalignment and slipping. Simple inserts and slots ensure perfect alignment every time.



Protected handling

The claws are covered with a plastic part to avoid any harm during installation.



Robust fixing

The claw length has been increased for a better fixation in the box. When you hear a click sound, you know the claws are perfectly placed into the fixing frame.

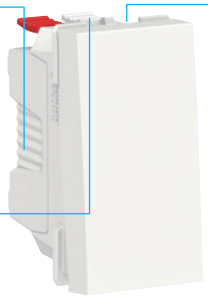
Switch to smart design

Extra space
A low mounting depth of 21mm provides extra space for wiring.

Easy removal
Inserts can be removed from the front and back thanks to the clearly visible notches.

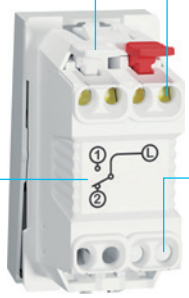


Robust clipping
The improved design of the clipping system secures the insert in the fixing frame.

Clear on/off status
The large rocker clearly indicates the status of the switch in the On and Off positions. When switched off, the rocker angle is now wider for increased separation of the contacts avoiding electrical arcs, contributing to make the switch more secure, and improving electrical performance.

Quick wiring
Prominent quick release buttons are easily accessible, making wiring quick and easy.

Simple connection
A wiring diagram is printed on the rear of the switch and push-button base to make connection options clearly visible.

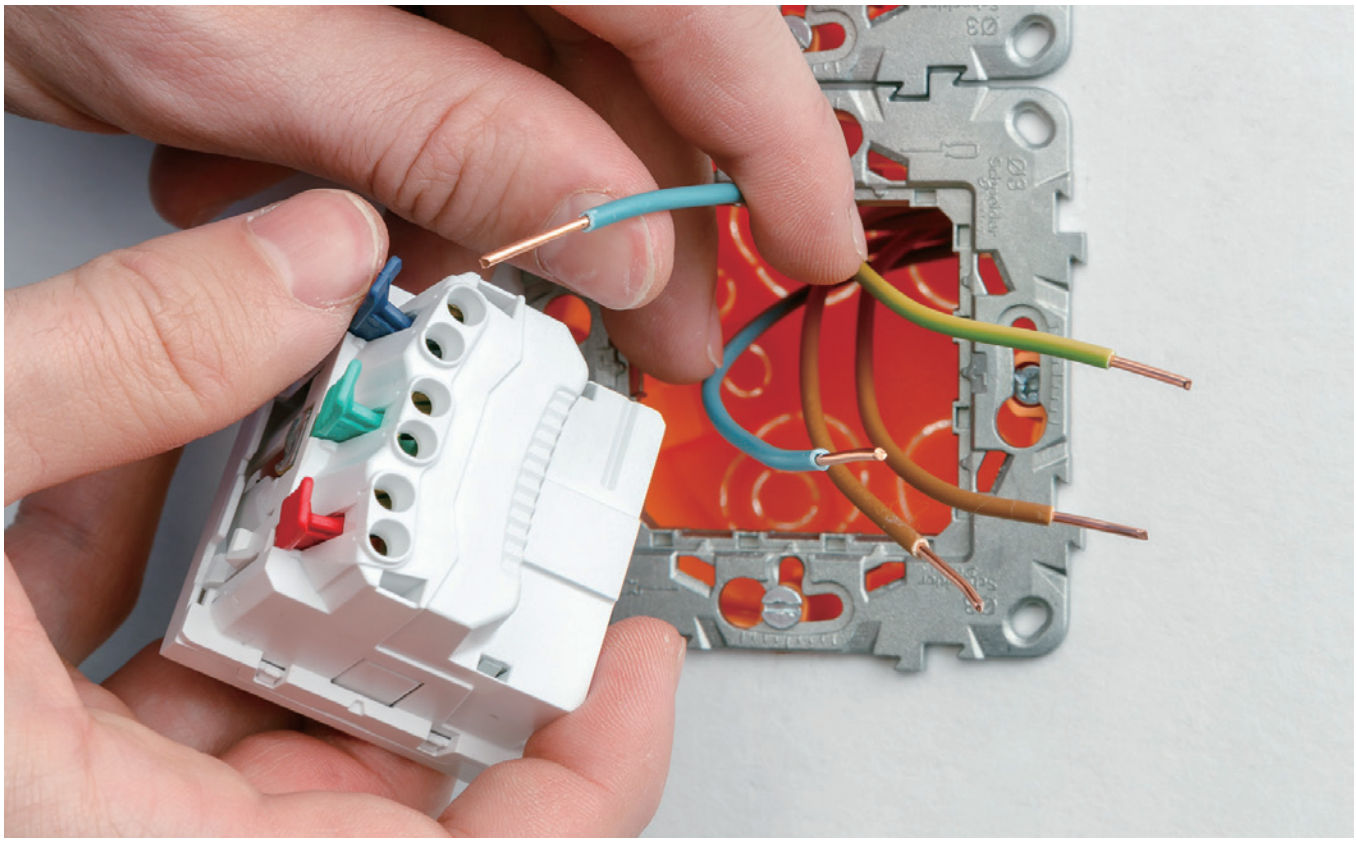


Effortless wiring
Conical cable entries make it easier to feed the connection wires into the terminal blocks. Even thicker wires can be connected in less time thanks to the larger openings.

Covered cable entries
Cable entries that are not needed are covered, avoiding improper installation.

Easy indicator conversion
It's easy to convert any switch to a switch with and indicator lamp. Simply remove the standard rocker and add the accessory lamp and a rocker with light window.

Convenient testing from the front
Unica switch and push-button inserts are designed to make installation easy, even for inserts that have already been installed. Checkpoints allow convenient testing of all functions and measuring from the front. Plus, there's no need to disassemble the switch – the rocker can easily be removed to access the checkpoints.



Special functions

One-way switch and push-buttons

For one-way switches and push-buttons, the phase and neutral cable entries are both on the top. This allows for simpler and faster wiring, without having to turn the insert to wire the other cable.

Slim insert

All white switch inserts come with a smaller housing, which offers more space for easy and fast wiring.

Intermediate switch

Having different colors for the two circuits makes it easy to distinguish between each for simpler and faster installations.

Push-button upgradable

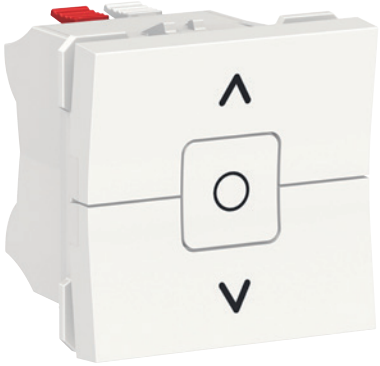
All switch inserts with aluminium or anthracite rockers can be upgraded to a push-button due to the larger housing and push-button spring.

Switch to diversity

The new Unica range offers a wide choice of switches for every application, from standard light switches to pushbutton, roller blind, fan control, card switch, and more.

Switches and push-buttons

With a switch and pushbutton range including 16A or 20A, one-way or two-way, intermediate switch or two poles, with screw terminals or screwless, Unica offers the perfect switch for all applications.



Roller blind switches

Unica roller blind switches feature an intuitively designed stop button in the center, with ‘up’ and ‘down’ in the corresponding rocker positions.

Card switches

Simplified from three to two modules, the Unica card switch offers compact size and greater flexibility. They can be simply installed the same way as other switches, with no need to remove the cover first.

Sockets with screw terminals

Extra space
A low mounting depth of 21mm provides extra space for wiring.

Unclipped center plate
The center plate is unclipped, allowing easy removal for wiring.

Easy removal
Inserts can be removed from the front and back thanks to the clearly visible notches. The center plate can also be removed easily.

Shock protection
Integrated shutters protect against accidental contact and the ingress of foreign objects.

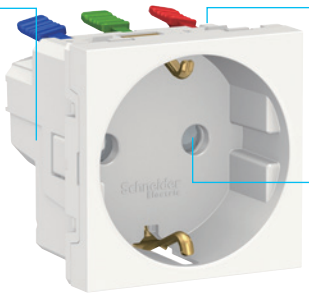
Large cable entries
Large cable entries allow wiring of 2,5mm^2 and 4mm^2 rigid and flexible cables.

Improved protection
Cable entries are clearly separated, making wiring more intuitive and avoiding short-circuit risk when flexible wires are used.

Fast wiring
With the cable entries beside each other, you can cut all wires to the same length. The screws are positioned unfixed, so you don't have unscrew them before you start to wire the cables.

Sockets with screwless terminals

Extra space
A low mounting depth of 21mm provides extra space for wiring.



Easy removal
Inserts can be removed from the front and back thanks to the clearly visible notches. The center plate can also be removed easily.

Shock protection
Integrated shutters protect against accidental contact and the ingress of foreign objects.

Effortless wiring
Conical cable entries make it easier to feed the connection wires into the terminal blocks. Even thicker wires can be connected in less time thanks to the larger openings.

Quick wiring
Screwless socket-outlet terminals and color-coded quick release buttons making wiring quick and easy, without the need to remove the centre plate.

Special socket-outlets

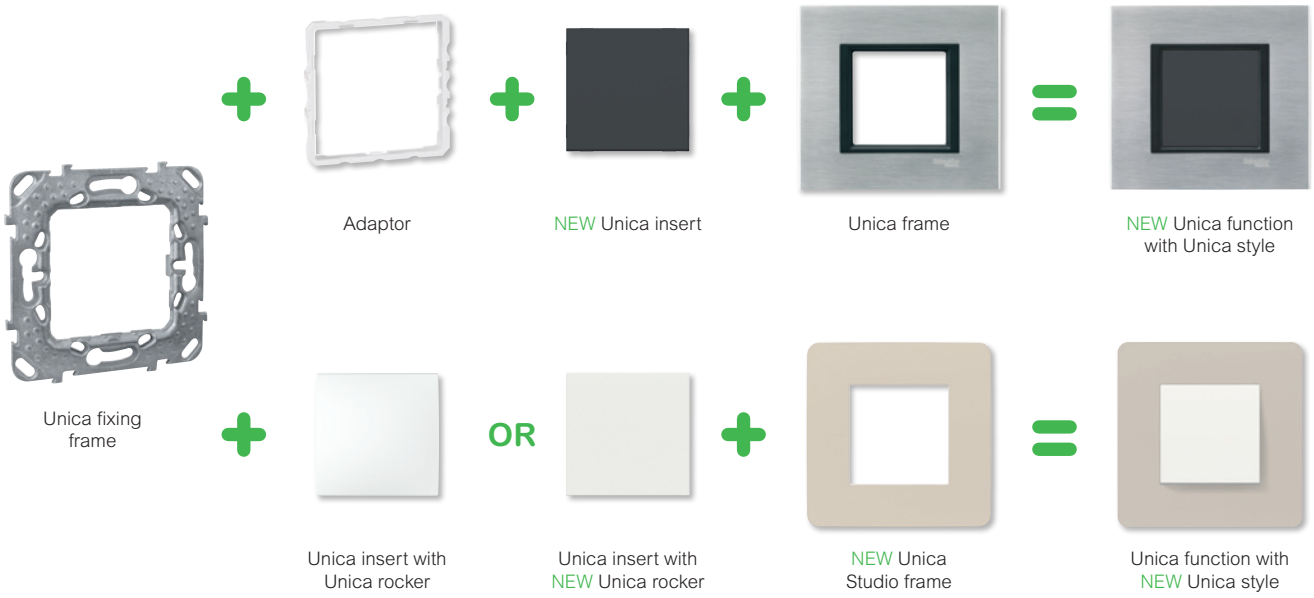
Socket-outlet with lid, which can be opened up to 180°

Double socket-outlet

The new Unica range includes socket-outlets for every application including single, double and multi-gang outlets. They offer faster screwed and screwless options, with extra room and wider openings for quicker, simpler wiring.

Backwards compatibility

Because the original Unica was one of the most popular switch and socket-outlet ranges in Europe, we wanted the new Unica range to be fully backwards compatible.

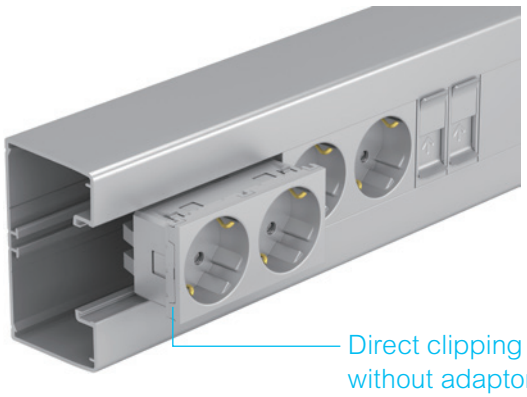


Unica accepts OptiLine 45 direct clipping

Unica facilitates faster installs through clever time-saving innovations. Because the range features 40mm x 40mm inserts, it accepts OptiLine 45 direct clipping to the trunking, poles and posts. There's no need to cut anything out or use adaptors – you just clip it into place.

One range for both applications

Unica allows for classical installations with wall boxes and trunking making the range uniquely simplified with no compromise on design. The switches installed on the wall box and the inserts clipped to the trunking are the same, creating a robust and flexible solution – no adaptors necessary.

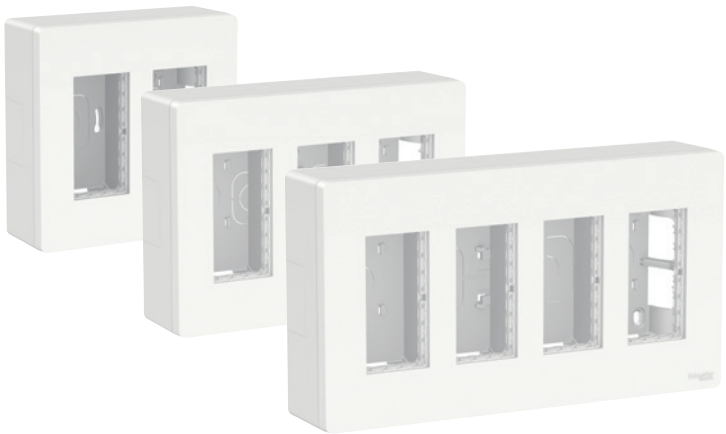


Simply Unica System +

Unica inspires collaboration with System + workstations that are so modular, they can be easily configured to create any combination of inserts. System + is ideal for offices or other commercial buildings where several functions are needed in one place.

A range of sizes

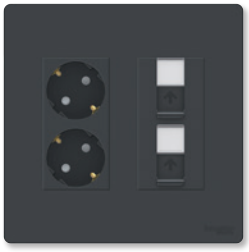
The new Unica System + workstations come in many different sizes, including vertical and horizontal orientations for maximum flexibility. There are surface and flush-mounted boxes available. Boxes can be interlocked as required, and all are compatible with Schneider Electric mini-trunking.



Choice of colors and kits

All boxes are available in white, aluminium and anthracite to match with Unica inserts. They are available as single components; complete with box, fixing frames, and covers; and as kits pre-equipped with the most common functions.

Workstation, white



Workstation, anthracite

Workstation, aluminium

	Surface	Flush
Vertical		
Horizontal		

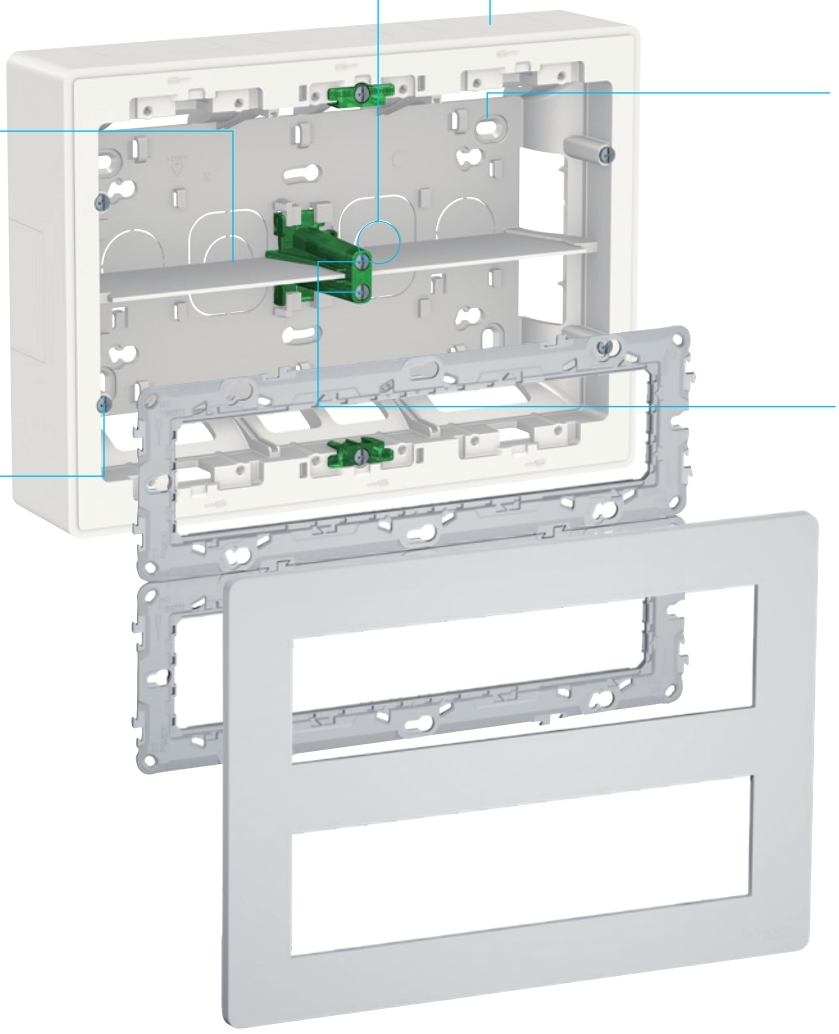
Unica System + surface installation

Surface horizontal

Flush-mounted box compatibility
Workstations can be placed over a flush-mounted installation box instead of bringing the cables in via the mini-trunking. The box features entry holes for the cables.

Added security
Slide-in dividers keep power and data cables separated for added security. Dividers can be used for horizontal and vertical channels.

Faster installs
Unica System + comes with screws pre-mounted and unscrewed so you don't have to waste time removing them.



Flexible installation
Several entrances allow installation without the need to use a drill.

Easy adjustment
The mounting holes allow vertical and horizontal movement to balance boxes for perfect alignment every time.

Dual orientation
Screw towers allow the frames to be fixed in the horizontal position.

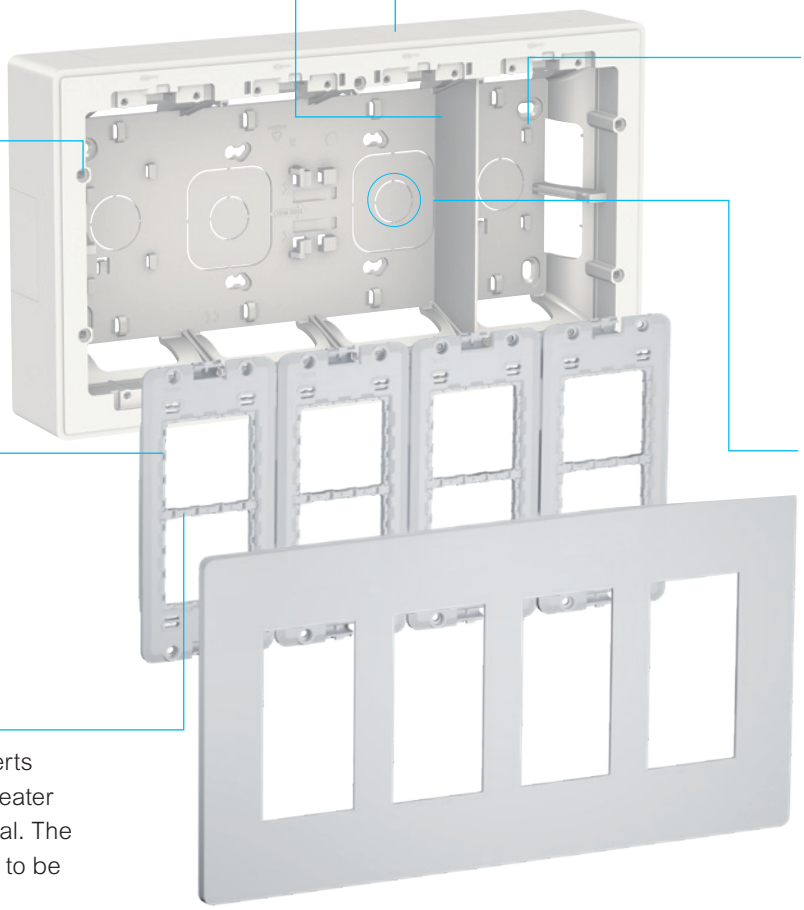
Mini-trunking compatible
Unica System + is compatible with Schneider Electric Mini-trunking.

Din Rail ready
The use of an adapter also allows Din Rail products such as Acti9 to be mounted.

Surface vertical

Added security
Slide-in dividers keep power and data cables separated for added security. Dividers can be used for horizontal and vertical channels.

Flexible installation
Several entrances allow installation without the need to use a drill. The screw tower can be installed both vertically and horizontally for more flexibility.



Easy adjustment
The mounting holes allow vertical and horizontal movement to balance boxes for perfect alignment every time.

Faster installs
Unica System + comes with screws pre-mounted and unscrewed so you don't have to waste time removing them.

Easy fixing
The fixing frames can be clipped directly to the workstations, without the need for tools.

Flush-mounted box compatibility
Workstations can be placed over a flush-mounted installation box instead of bringing the cables in via the mini-trunking. The box features entry holes for the cables.

Flexible clipping
Small bars allow single inserts to be clipped in for even greater flexibility and simple removal. The bars allow any Unica insert to be fixed to the boxes.

Connect multiple boxes
A small adaptor allows several boxes to be connected.

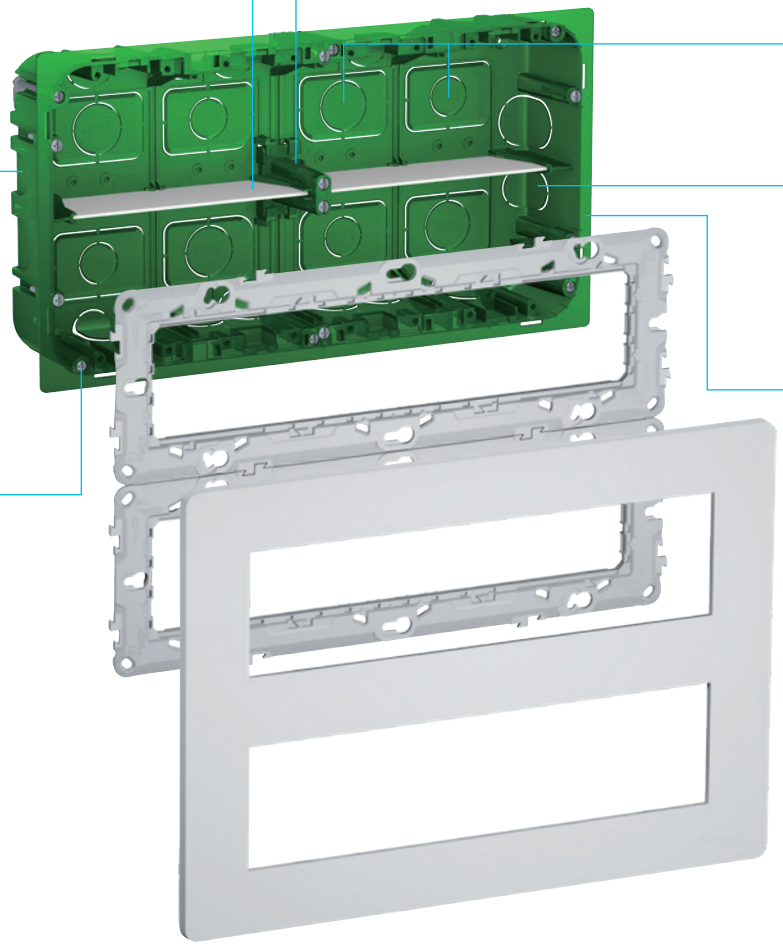
Unica System + flush installation

Flush horizontal

Increased rigidity
The boxes have been designed to be more rigid to make fixing to either vertical or horizontal frames much easier.

Added security
Slide-in dividers keep power and data cables separated for added security.

Dual orientation
The screw towers allow to fix the fixing frames in the horizontal installation.



Holes for 20mm Ø tubes
Holes for 25mm Ø tubes

Easier data cable installation
Box depth is now 50mm for easier installation of Cat6 and 6A data cables.

Easy drilling
Clear and wide holes to make sign on the wall for drilling.

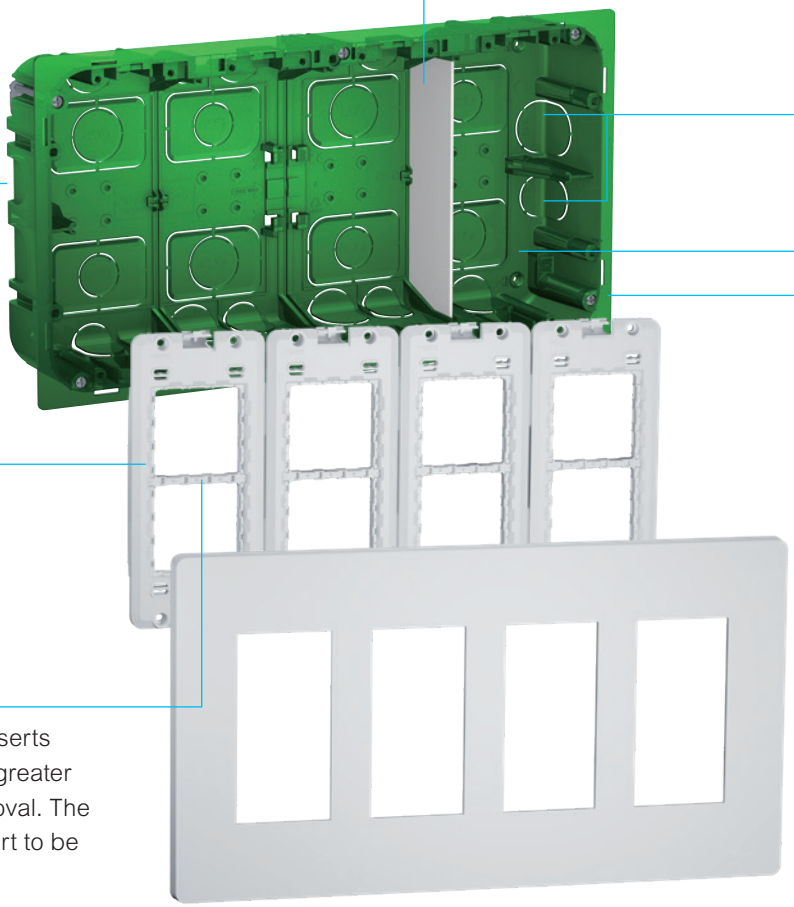
Broad flat frame
A broad and flat frame allows for perfect installation on the wall, even if it is uneven. The broad frame also stands proud of slightly larger holes to avoid “falling” into the hole.

Closed screws
Screws fully screwed in to avoid obstruction of holes with dust and other matter.

Flush vertical

Increased rigidity
The boxes have been design to be more rigid to make fixing to either vertical or horizontal frames much easier.

Added security
Slide-in dividers keep power and data cables separated for added security.



Holes for 20mm Ø tubes
Holes for 25mm Ø tubes

Easier data cable installation
Box depth is now 50mm for easier installation of Cat6 and 6A data cables.

Easy drilling
Clear and wide holes to make sign on the wall for drilling.

Easy fixing
The fixing frames can be clipped directly to the workstations, without the need for tools.

Broad flat frame
A broad and flat frame allows for perfect installation on the wall, even if it is uneven. The broad frame also stands proud of slightly larger holes to avoid “falling” into the hole.

Flexible clipping
Small bars allow single inserts to be clipped in for even greater flexibility and simple removal. The bars allow any Unica insert to be fixed to the boxes.

Simply efficient installation

Switch to simple efficiency on every install with new Unica System +. Clever features and design make the most used inserts – double sockets and RJ45 – fast and easy to install.

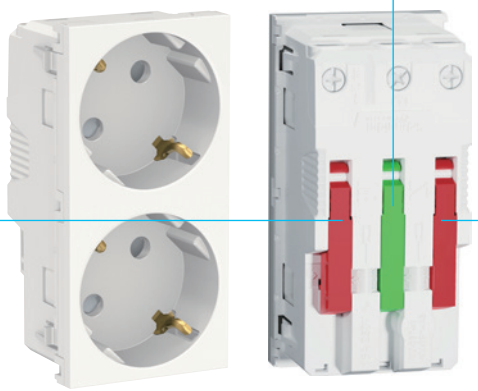
Double socket-outlet

Screw IPT terminal

The new Unica double socket-outlets feature insulated piercing terminals. You don't have to insulate the wires with a tool – you simply insert the wires, close the levers and the insulation happens automatically. Disassembling is also easy, and inserts can be used again.

Flexible cable sizes

1,5mm^2 and 2,5mm^2 rigid and flexible cables can be inserted.

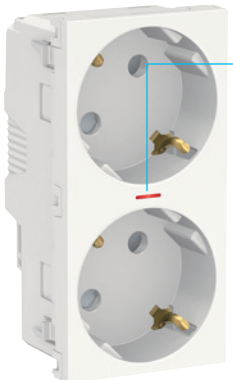


Screws on the back

There's no need to remove the center plate to screw – the center plate is simply clipped in.

Easy installation

The big levers can be opened up to 90°, which offers very easy access for wiring in, and removing cables.



Indicator light

Double socket-outlets are also available with an indicator light.

RJ45

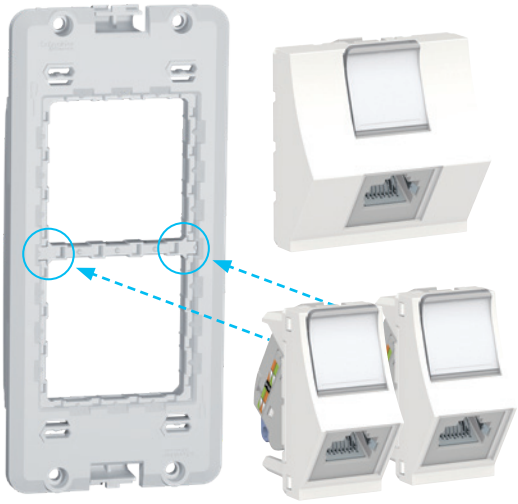
Time-saving installation
Unica offers several designs of RJ45 center plate. The double and quadruple versions are easy and fast to install. It also means you only need one device and less space for up to four connectors.

Convenient label holders
Used to identify the connected devices.

Protective shutters
Prevent ingress of dust and other objects when plug is not in use.

Total flexibility
The center plates can be used with any S1 Schneider Electric connector.

No adaptors needed
You can also clip inclined one or two module RJ45 connectors to the workstations. The bar on the fixing frame allows a secure fixing without the need for an adaptor.



Irresistibly future-proof

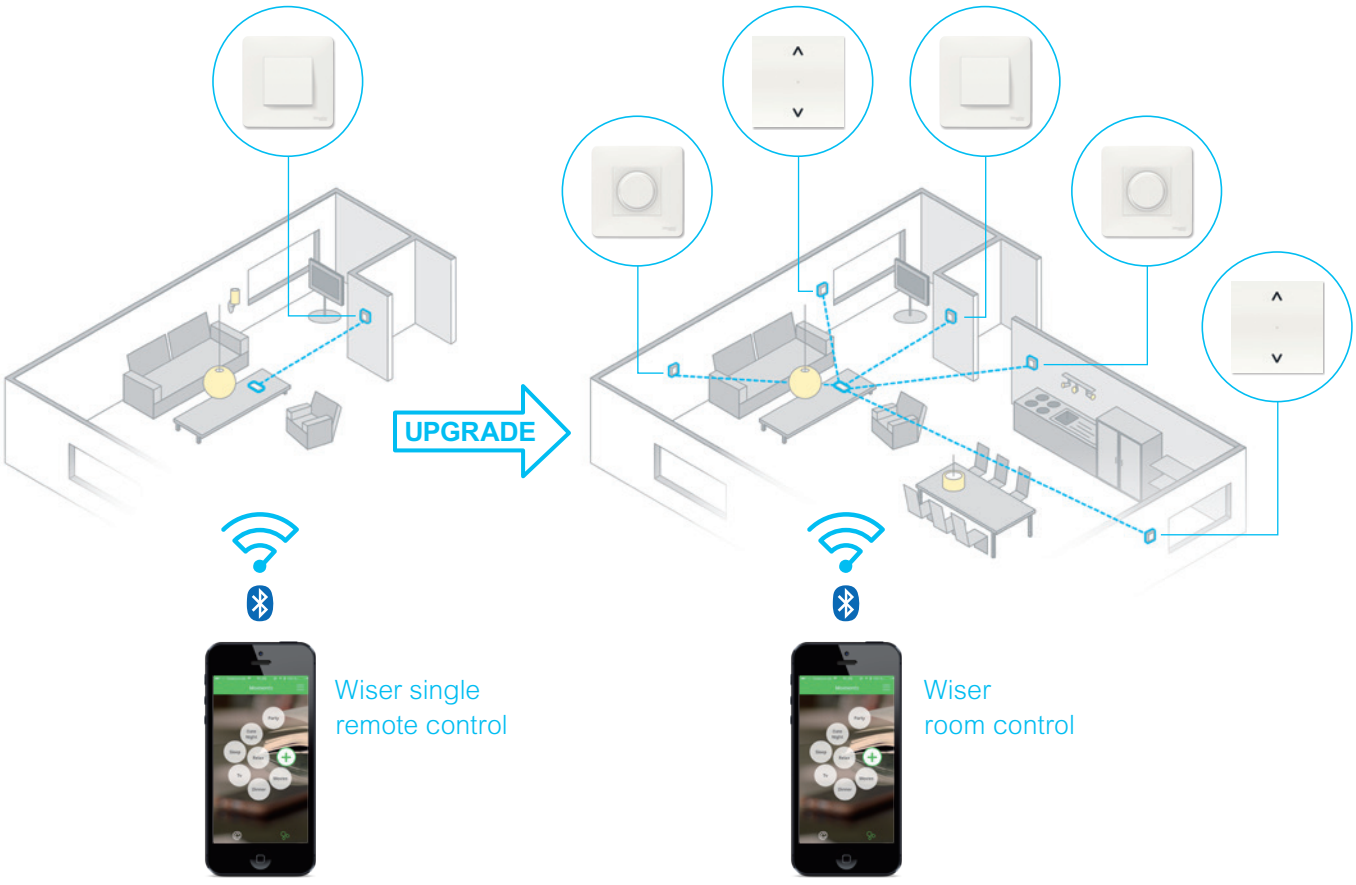
No matter what your customer is looking for, Unica has the right solutions, from standard electrical installations to fully connected systems. Scalable and future-proof, Unica is smart home-ready with a range of Wiser connected products.

Wiser
Connected Technology for Homes

Wiser smart home solutions

Wiser products leave nothing to be desired. Clever combined functions can be set up in either one product or a group of products to create special 'Moments' to suit your customers' preferences. You can also simply program and control Wiser products via the intuitive Wiser app.

Scalable home solutions with Wiser



Create special ‘Moments’ for your customer…

Imagine being able to set the scene for your next dinner party with just the press of a button on your smartphone or tablet. How about being able to tap one button to set the mood for an action movie or romantic comedy? With Unica Wiser products and the Wiser app, making the most of every ‘Moment’ is easy.

Create ‘Moments’

Functions you can group together for special ‘Moments’ are light settings and shutters. Your special ‘Moments’ might be the perfect setting for cooking, enjoying a meal, exercising, reading a book, or watching a movie or your favorite sport. ‘Moments’ can be created and activated with the app. Then in one tap, you’re in the moment.

Start simple and grow

Setting up a smart home system is simple and scalable with Wiser connected products. You can start simply with a single smart product like a dimmer that you can control manually or via the Wiser app. Then later you can add more functions in a room and group them to create new ‘Moments’ as your smart home grows.

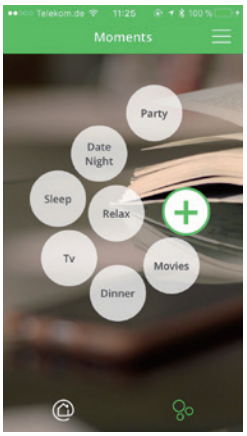
Easy Bluetooth connectivity

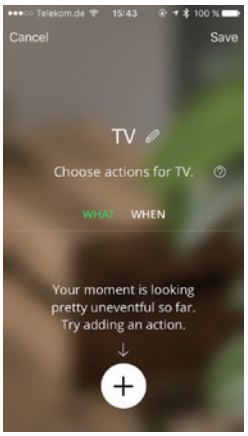
Unica Wiser products connect seamlessly to the Wiser app on your smartphone or tablet via hassle-free Bluetooth technology. Pairing a switch or timer is easy and allows you control its function from anywhere in the room.

Multitasking Wiser switches

Even a single Wiser switch can offer multitasking with different functions combined to provide smart solutions. For example, a dimmer is not just a dimmer; it can also be an alarm clock. It can even help children fall gently to sleep with the smart ‘Fall asleep’ function. Or, how about a motion sensor during the day, that becomes a night light at night?

Controlled via the app, Unica’s multitasking Wiser products offer many new possibilities to create perfect ‘Moments’ for your customers.





…and gain more moments for you

As well as being fast and easy to install, Unica Wiser products are designed to be super-easy to program with just a few taps on the app. All ‘Moments’ can be achieved easily and efficiently with Unica’s simplified range, leaving more time for your own special ‘Moments’.

Easy and fast programming

All settings and programming of single devices or ‘Moments’ can be done via the Wiser app.

More possibilities in one range

We’ve designed the new Unica Wiser range to cover all key functions in the home and commercial environments from only a select number of products. This makes it easier for you to offer more possibilities to your customers with one range.

Work smarter

Smartphones and tablets are not only used in your private life. They're also part of your working day. We developed the Wiser app so the new Unica Wiser devices would be super-easy to configure. You simply set everything up from your smart device.

Simple app set-up

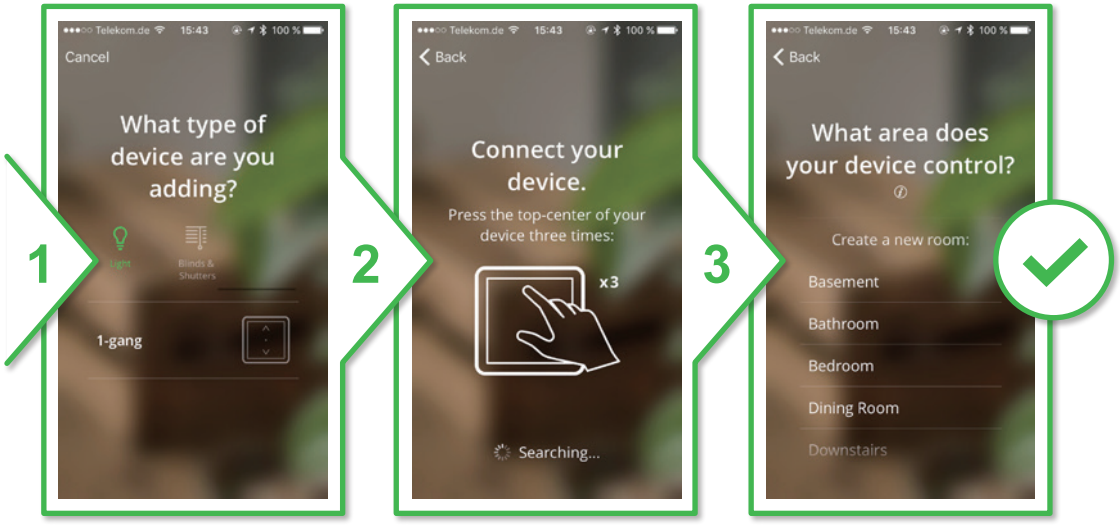
The Wiser app has a simple, intuitive interface allowing you to program everything without the need for specialized training or tools. The app will guide you through the simple process.

Simplified programming & adjustment

Setting up and adjusting settings no longer requires removal of the insert to access Poti or Dip switches on the back, nor working on a small product display. You simply use the Wiser app on your smartphone or tablet. You can also make adjustments at any time via the app.

Easy set-up

The Wiser app can be programmed in three simple steps.
The app guides you through the process:



Step 1:
Select the device

Step 2:
Pair the device

Step 3:
Select the room

GET IT ON Google Play

Download on the App Store

For smartphones and tablets:
The Wiser app is available for both Android and iOS devices.

Unica leaves nothing to be desired

The new Unica range features beautifully designed smart products that offer greater levels of comfort and style for homes and offices. From creative lighting possibilities to connectivity and entertainment, Unica embraces current and future trends and applications.

Reduced energy costs

Unica thermostats can set a temperature and maintain it at a comfortable level as the outside temperature fluctuates, while also helping to reduce energy costs.

Simple shutter control

Manually controlling your shutters at the push of a button, or automatically via a time controller, Unica offers a greater level of convenience. Plus, your shutters protect your interiors from sun damage, and can even prevent burglary.

Lighting control

The range features rotary and push-button dimmers for a pleasant, light atmosphere optimized for both conventional and LED lighting. Automatic light control with movement detectors offers greater energy efficiency.

Socket-outlets

New Unica socket-outlets feature integrated child protection. Self-sealing shutters sit behind the electrode holes, which close when the plug is removed, reducing the chance of a child inserting anything into the holes. Unica socket-outlets are also available with IP44 protection against water and dust.

Connectivity

New Unica includes connectivity inserts for every socket type in the home or commercial application. “Intelligent” USB chargers allow smartphones and other devices to be charged directly to the socket, without the need for separate chargers. RJ45 sockets are for wired network connectivity, and HDMI sockets connect HDTV and AV components simply and neatly.

Commercial functionality

Designed to meet the diverse requirements of hotels, hospitals, offices and commercial buildings, Unica’s special function products are the perfect answer.

All you need is Unica

Unica features clever products with smart functionality. You can easily set functions to suit your customers' preferences, and the range will grow with their requirements for a completely personalized, adaptable experience.

Living room

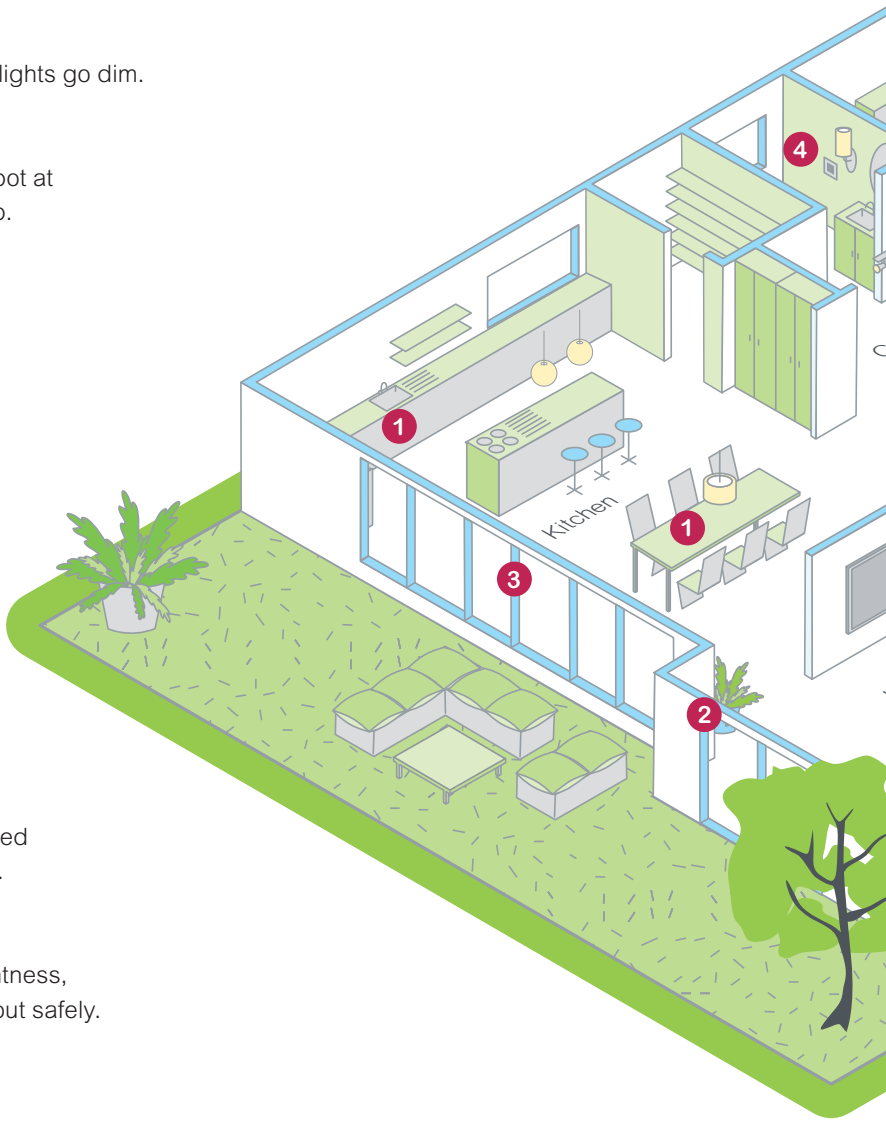
Moment 'Watch a movie' – the shutters go down; the lights go dim. Just the way you like for a perfect movie night. Roll it.

Moment 'Read a book' – the indirect lights dim, the spot at the couch switches on, and the shutters open. Feet up.

Kitchen

Moment 'Cooking' – the main lights and spots are switched to bright giving plenty of light to create the perfect meal. Bon appétit.

Moment 'Dinner party' – tonight's the night; the lights dim, selected spots switch on, and the garden lights complete the scene. Let's party.



Corridor

Automatic light control during the day
Unica includes a motion sensor light that doubles as a night light. During the day when movement is detected the light switches on, and off after a set period of time.

Smart night light function
Switch the dimmer function on to a lower level of brightness, e.g. 15 percent during the night, to help you move about safely.

Bedroom

Wake-up and fall asleep function
The Unica LED dimmer is ideal for the bedroom and all of your living spaces. Ease into sleep each night and wake up smoothly with lights that dim down, and then illuminate slowly to 100 percent at a set time. Think of them like a gentle alarm clock for a more pleasant way to start each day.

Automatic shutter control
Unica shutter control push-buttons allow you to open and close individual shutters or groups of shutters by setting your customer's preferences for open and shut times using the Wiser app.

1 LED Rotary dimmer

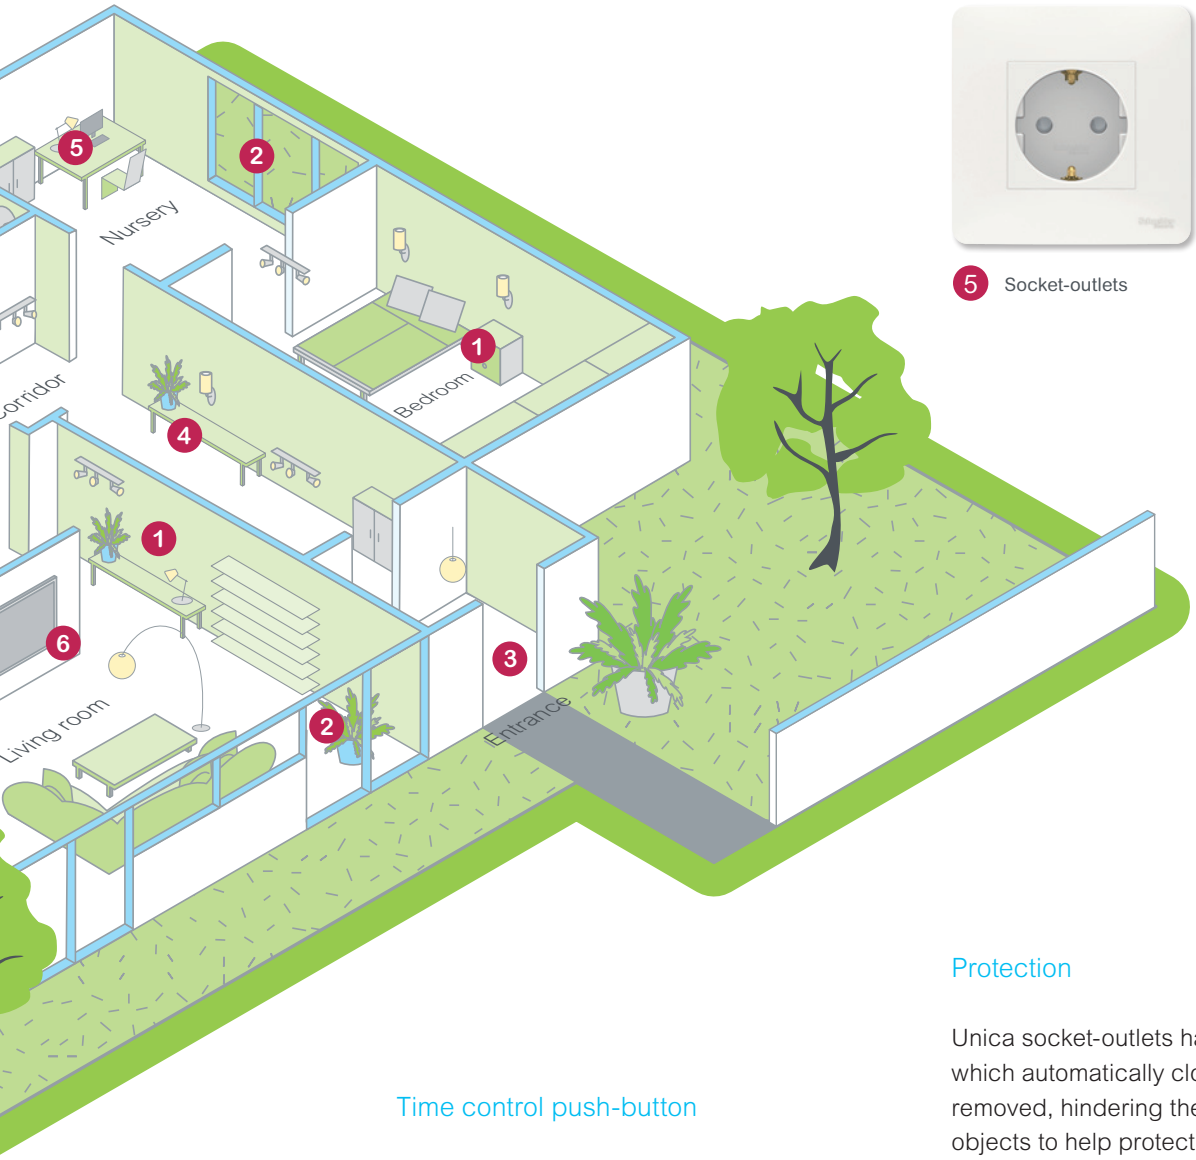
2 Shutter control

3 Time control push-button

4 Automatic dimmer

5 Socket-outlets

6 USB chargers



Time control push-button

To have your lights illuminated when you come home, simply enter your estimated arrival time. They can also be set to illuminate randomly each day while you're away, giving the illusion that someone is at home. Unica time control push-button switches also allow you to turn garden lights on and off automatically. Simply schedule via the app, and with the astro-clock function, times automatically track with seasonal changes.

Protection

Unica socket-outlets have integrated shutters which automatically close when a plug is removed, hindering the ingress of foreign objects to help protect children from electric shocks.

Connected

In a digital world it is more and more important to be connected 24/7. Unica offers a wide range of products like USB chargers for your tablets and smart phones, RJ45, HDMI connectors and much more.

Building control with KNX

KNX is the intelligent building control system for all living areas and workspaces, from single-family houses to office complexes and hotel facilities.

Unica offers all the KNX components required for connected, comfortable, and energy-efficient building control situations. They are easy to plan, install and operate. The familiar KNX system devices, actuators and sensors are now complemented by the new KNX Multitouch Pro; the new user interface that provides comprehensive functions and flexibility. They're easy to install and commission, saving you time and money.

Intuitive user interfaces

The KNX Multitouch Pro represents an entirely new generation of KNX user interfaces. It features intuitive controls, flexible functions and an aesthetically appealing design.

Innovative design

The new KNX Multitouch Pro features a harmonious, contact-sensitive touchscreen with a low mounting depth, so its placement in the frame is particularly flat. The display and the frame form a seamless unit with no protruding buttons. All functions are selected and directly controlled via the contact-sensitive touchscreen.

Flexible and individual

The unit offers a choice of two interface designs, with vertical or rotary arrangement, or a combination of both. The option to customize the screensaver individually is especially practical in the commercial sector. Whether in offices, hotels or the home – the KNX Multitouch Pro is an ideal contemporary solution wherever the emphasis is on design and functionality.

Integrated temperature sensor

The KNX Multitouch Pro has an integrated temperature sensor for connecting to a building's HVAC system, and can also be connected to a floor heating sensor.

Proximity sensor and gesture function

The proximity sensor illuminates the display when the user approaches. The gesture function allows you to control the most-used function with a simple hand gesture.

Intelligent operating philosophy

The KNX Multitouch Pro function control system is similar to that of a smartphone or tablet.
Swiping is used for simple and intuitive switching between up to eight main screens.
The main menu provides direct access to each function, e.g. temperature settings.
Sub menus are accessed by tapping the screen.

Installation and commissioning

The new KNX Multitouch Pro offers a completely new approach to planning, commissioning and installation. Simpler, faster and more flexible. In the past, all KNX functions had to be predefined before installation. Now the new KNX user interface makes planning simpler. An express commissioning feature enables rapid project design. The KNX Multitouch Pro does not require an additional power supply.

Motion sensors

With push-button

2 modules

white	**NU552518**
aluminium	**NU552530**
beige	**NU552544**
anthracite	**NU552554**

Maximum loads

LED lamp 230 V	200 W
incandescent lamp 230 V	2200 W
halogen lamp 230 V	2000 W
motor (single-phase) 230 V	1000 VA
LV halogen lamps 12 V – electronic transformer	1050 VA
LV halogen lamps 12 V – wound transformer	500 VA

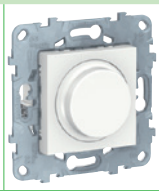
Characteristics

- Rated current: 10 A
- Screw terminal connection
- Wire configuration without neutral
- Movement detection area: 8 m frontal, 8 m lateral
- Remote control by unlimited number of auxiliary push-button
- Automatic load detection
- Time delay range: 1...30 min
- Master/slave option; connecting two sensors together for covering larger area

Dimmers

Universal

2 modules



white	**NU551418**
aluminium	**NU551430**
beige	**NU551444**
anthracite	**NU551454**

Maximum loads

LED lamp 230 V	RC: 5...100 VA RL : 5...20 VA
incandescent lamp 230 V	5...200 W
halogen lamp 230 V	5...150 W
LV halogen lamps 12 V – electronic transformer	5...150 VA
LV halogen lamps 12 V – wound transformer	5...150 VA

Characteristics

- Remote control by unlimited number of auxiliary push-button
- Automatic load detection
- Wire configuration without neutral
- Screw terminal connection
- Memory function
- Automatic overload protection, overheating protection, short-circuit protection

Thermostats

	Room - 8 A	Floor - 10 A
2 modules		
white	**NU550118**	**NU550318**
aluminium	**NU550130**	**NU550330**
beige	**NU550144**	**NU550344**
anthracite	**NU550154**	**NU550354**
Characteristics		
	• For heating and air-conditioning • Settings range: + 5 to + 30 °C • Blue and red LED's for conditioning or heating indication	• For floor heating • Settings range: + 5 to + 45 °C • Green LED for voltage supply indication • Red LED for heating indication • Delivered with a 4 m temperature sensor

Timers

Countdown timer relay - 10 A

2 modules

white	**NU553518**
aluminium	**NU553530**
beige	**NU553544**
anthracite	**NU553554**

Characteristics

- Time delay range: 5 min to 8 h
- Integrated status LED
- 3-wires (neutral required)

Unica
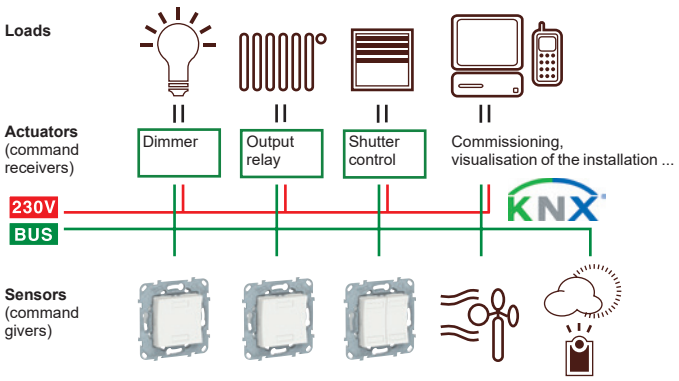
KNX

The following Unica control devices have to be connected to KNX bus line.
The KNX bus line is laid in parallel to the 230 V power supply.
When Unica sensor is activated, an actuator (e.g. the roller shutter control) will carry out all the switching commands required.

Introduction



Controls

Push-buttons	2 buttons and 2 blue status LEDs, with screwless bus connecting terminals	4 buttons and 4 blue status LEDs, with screwless bus connecting terminals
2 modules		
white	**NU553018**	**NU553118**
white antibacterial	**NU553020**	**NU553120**
aluminium	**NU553030**	**NU553130**
anthracite	**NU553054**	**NU553154**
Characteristics		
	• The status LED is located under the symbol window which can be taken off. • With integrated bus coupler. The bus is connected using a bus connecting terminal. Contents: • With set of 10 symbols: - 2 x symbol with light opening, - 1 x symbol “1”, - 1 x symbol “0”, - 2 x symbol for dimming, - 2 x symbol for shutter, - 2 x symbol (neutral). • With bus connecting terminal.	• The status LED is located under the symbol window which can be taken off. • With integrated bus coupler. The bus is connected using a bus connecting terminal. Contents: • With set of 20 symbols: - 4 x symbol with light opening, - 2 x symbol “1”, - 2 x symbol “0”, - 4 x symbol for dimming, - 4 x symbol for shutter, - 4 x symbol (neutral). • With bus connecting terminal.
	KNX software functions: Switching, toggling, dimming (single/dual-surface), blind (single/dual-surface), pulse edges trigger 1-, 2-, 4- or 8-bit telegrams (distinction between short and long operation), pulse edges with 2-byte telegrams (distinction between short and long operation), 8-bit linear regulator, scene retrieval, scene saving, disable functions.

Wiser relay switches

10 A	
2 modules	
☐ white	**NU353720**

Characteristics

- Relay switch for various purposes such as weekly scheduling using Wiser App, presence simulation, count-down timer
- LED indicates when switch is on
- Remote control from smartphone or tablet using Wiser App

Wiser blind control switches

4 A	
2 modules	
☐ white	**NU350820**

Characteristics

- Control of blinds locally from the switch or remotely from smartphone or tablet using Wiser App
- Weekly scheduling
- Presence simulation
- Can be used for controlling up to 10 multiple relays, each controlling one blind motor

Wiser dimmers

		Push-button	Rotary
2 modules			
☐ white		**NU351520**	**NU351620**
Maximum loads			
LED lamp 230 V		RC: 7...100 VA RL : 7...20 VA	RC: 7...100 VA RL : 7...20 VA
incandescent lamp 230 V		14...200 W	14...200 W

LV halogen lamps 12 V	electronic transformer	1050 VA	14...150 W
	wound transformer	500 VA	14...150 W

Characteristics

- Wire configuration with neutral
- Movement detection area 8 m frontal, 8 m lateral
- Movement detection angle: 160 °
- Configuration with time delay range, triggering light level… is done using the Wiser App
- Built-in push button switch for dim (only with dimmer version) and on/off switching

		• see Wiser dimmers for others characteristics

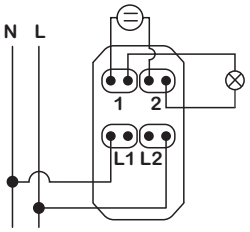
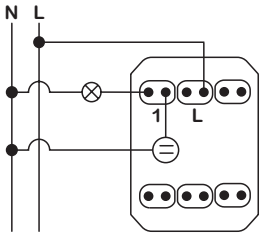
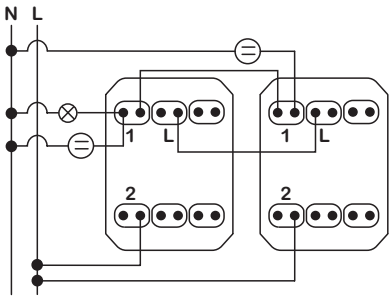
1 module - 2 two-way switches with indication lamp



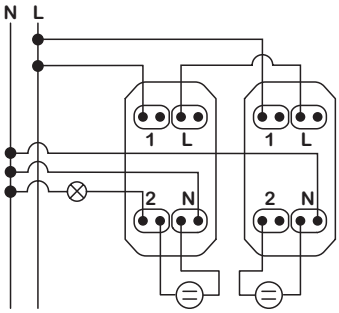
Double pole switch with indication lamp



2 modules - One-way switch with indication lamp



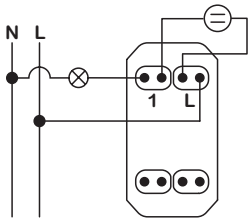
2 modules - 2 two-way switches with indication lamp



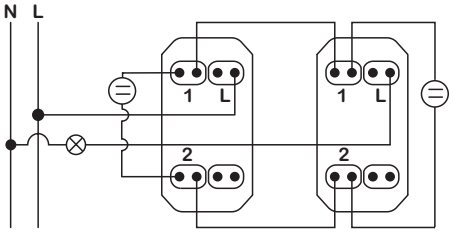
1 module - 2 two-way switches
with indication lamp and neutral connection

Switches and push-buttons with location lamp

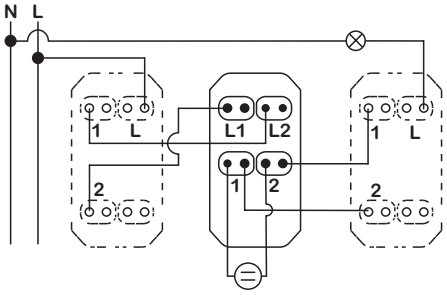
Connection examples



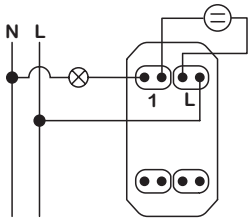
1 module - One-way switch
with location lamp



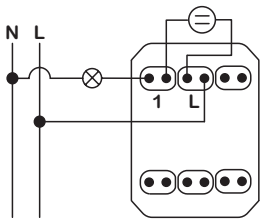
1 module - 2 two-way switches
with location lamp



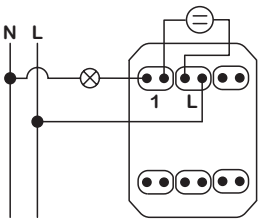
1 module - 2 two-way switches
+ 1 intermediate with location lamp



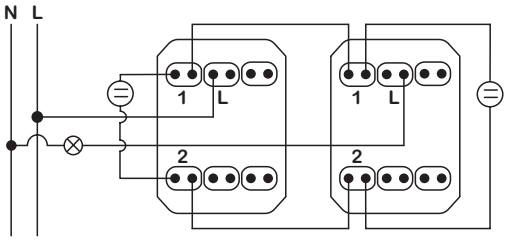
1 module - Push-button
with location lamp



2 modules - One-way switch
with location lamp



2 modules - Push-button with location lamp

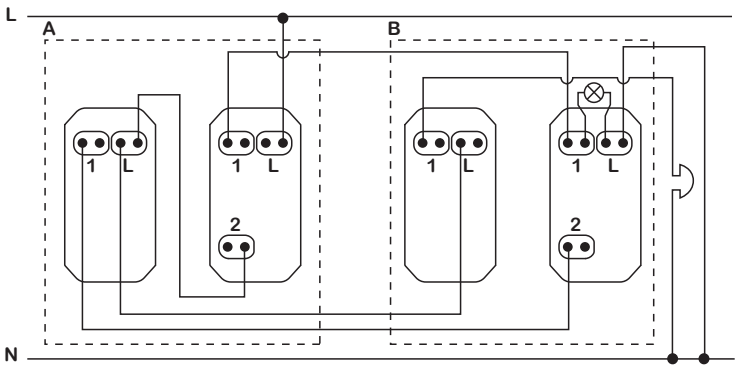


2 modules - Two way switch with location lamp

Room control

Room control unit and lamp & bell push-button

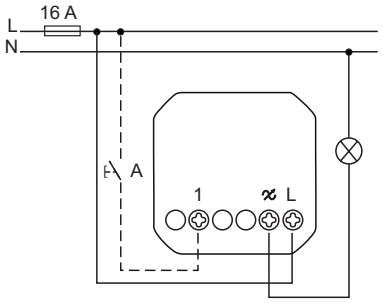
A: NU5217●● & B: NU5777●●



Control unit and lamp & bell push-button connection for room indication

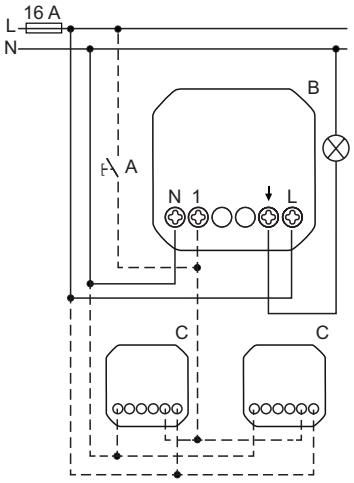
Connections
Comfort control inserts

Universal rotary dimmer LED
NU35141●●



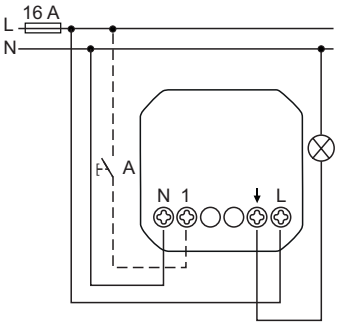
Controlling blinds locally

Motion sensor with switch 10 A
NU3525●●



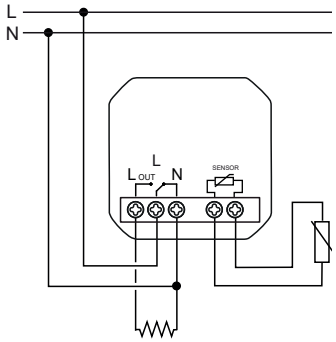
Detection moving heat sources (e.g. persons)

Countdown timer 10 A
NU3535●●

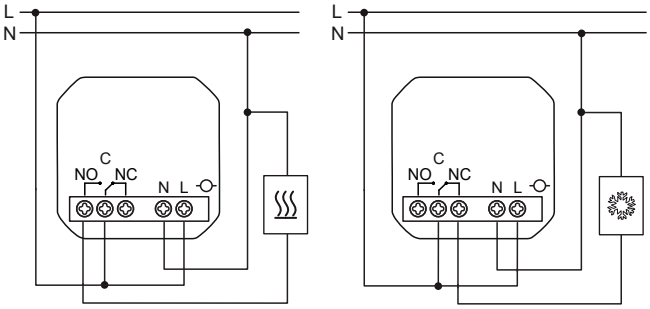


Manual switching off or restarting the overtravel time with an activated overtravel time

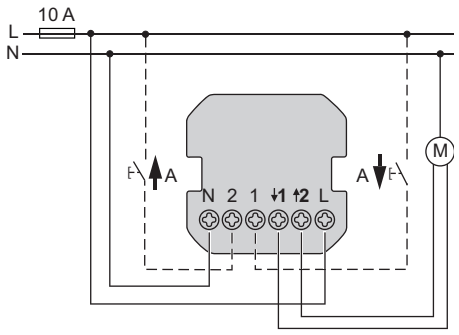
Floor thermostats 10 A
NU3503●●



Room thermostats 8 A
NU3501●●

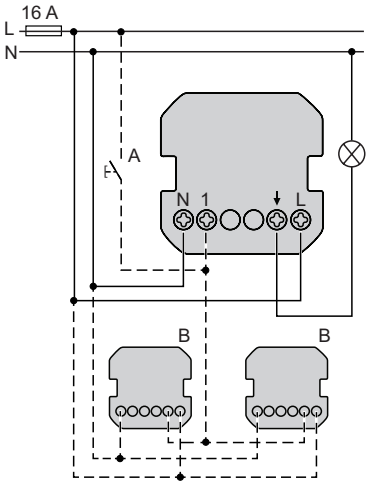


Wiser blind control switch
NU3508●●



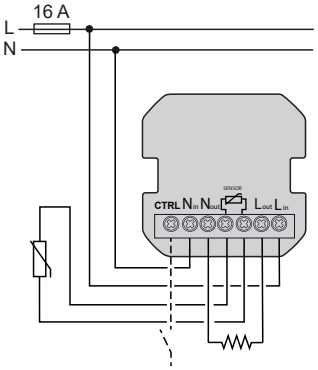
Controlling blinds locally via the Internet using Wiser Home Touch

Wiser motion sensor with switch 10 A
NU3526●●

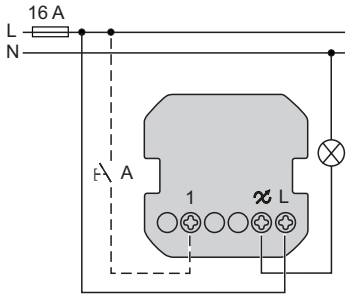


Detection moving heat sources (e.g. persons) via the Internet using Wiser Home Touch

Wiser/Floor thermostat
NU5505●●

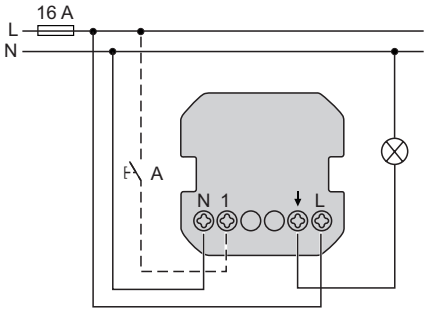


Wiser motion sensor with universal push-button dimmer LED
NU3527●●



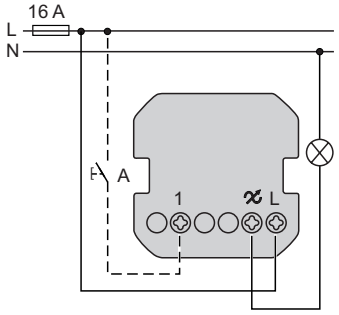
Detection moving heat sources (e.g. persons) and can dim ohmic via the Internet using Wiser Home Touch

Wiser relay switch 10 A
NU3537●●



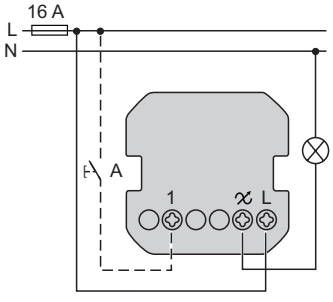
Room control and Home control with Wiser control via the Internet using Wiser Home Touch

Wiser universal push-button dimmer LED
NU3515●●



Room control and Home control with Wiser control via the Internet using Wiser Home Touch

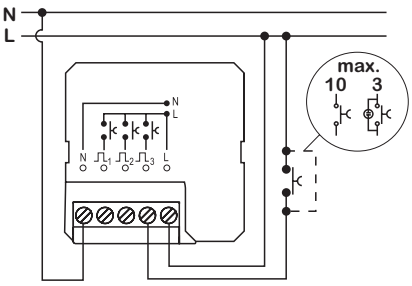
Wiser universal rotary dimmer LED
NU3516●●



Room control and Home contro with Wiser control via the Internet using Wiser Home Touch

Electronic door bell

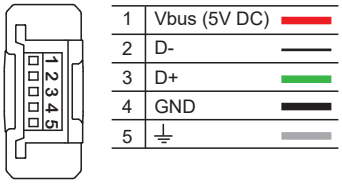
NU3535●●



Manual switching off or restarting the overtravel time with an activated overtravel time

USB data connector

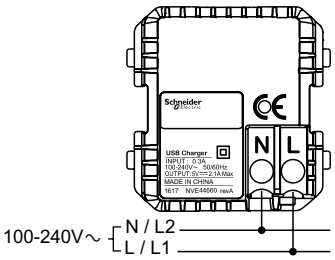
NU3501●●

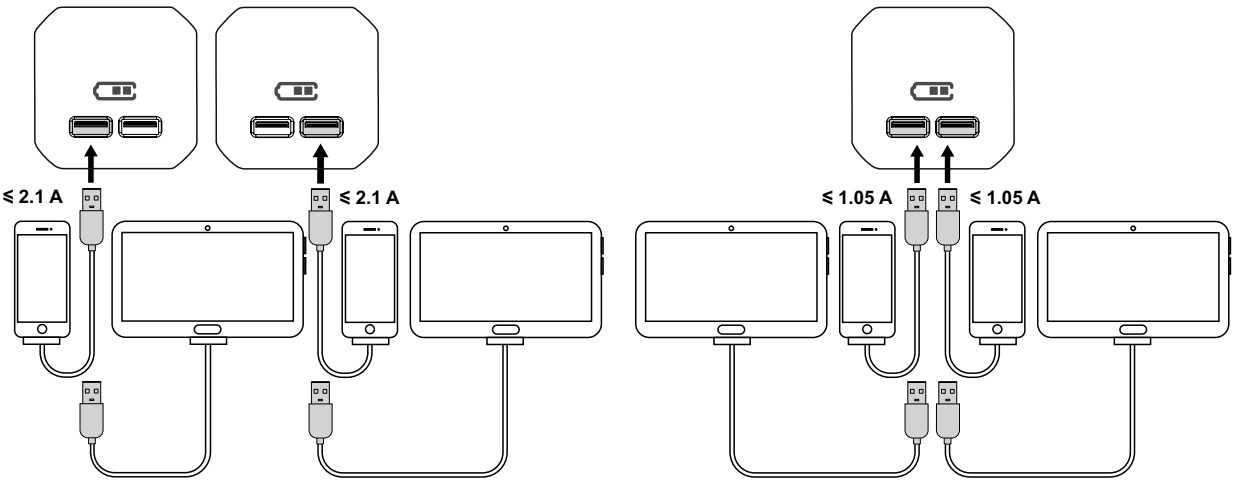


USB Chargers

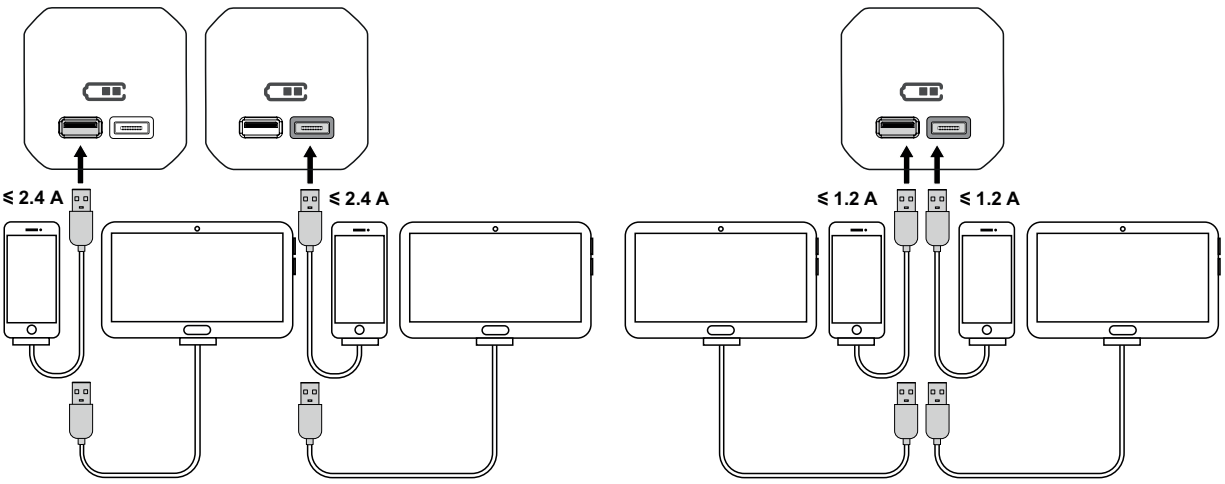
Type A: **NU3428●●** (1 module) - **NU3418●●** (2 modules)

Type A + C : **NU3018●●** (2 modules)





USB type A connection

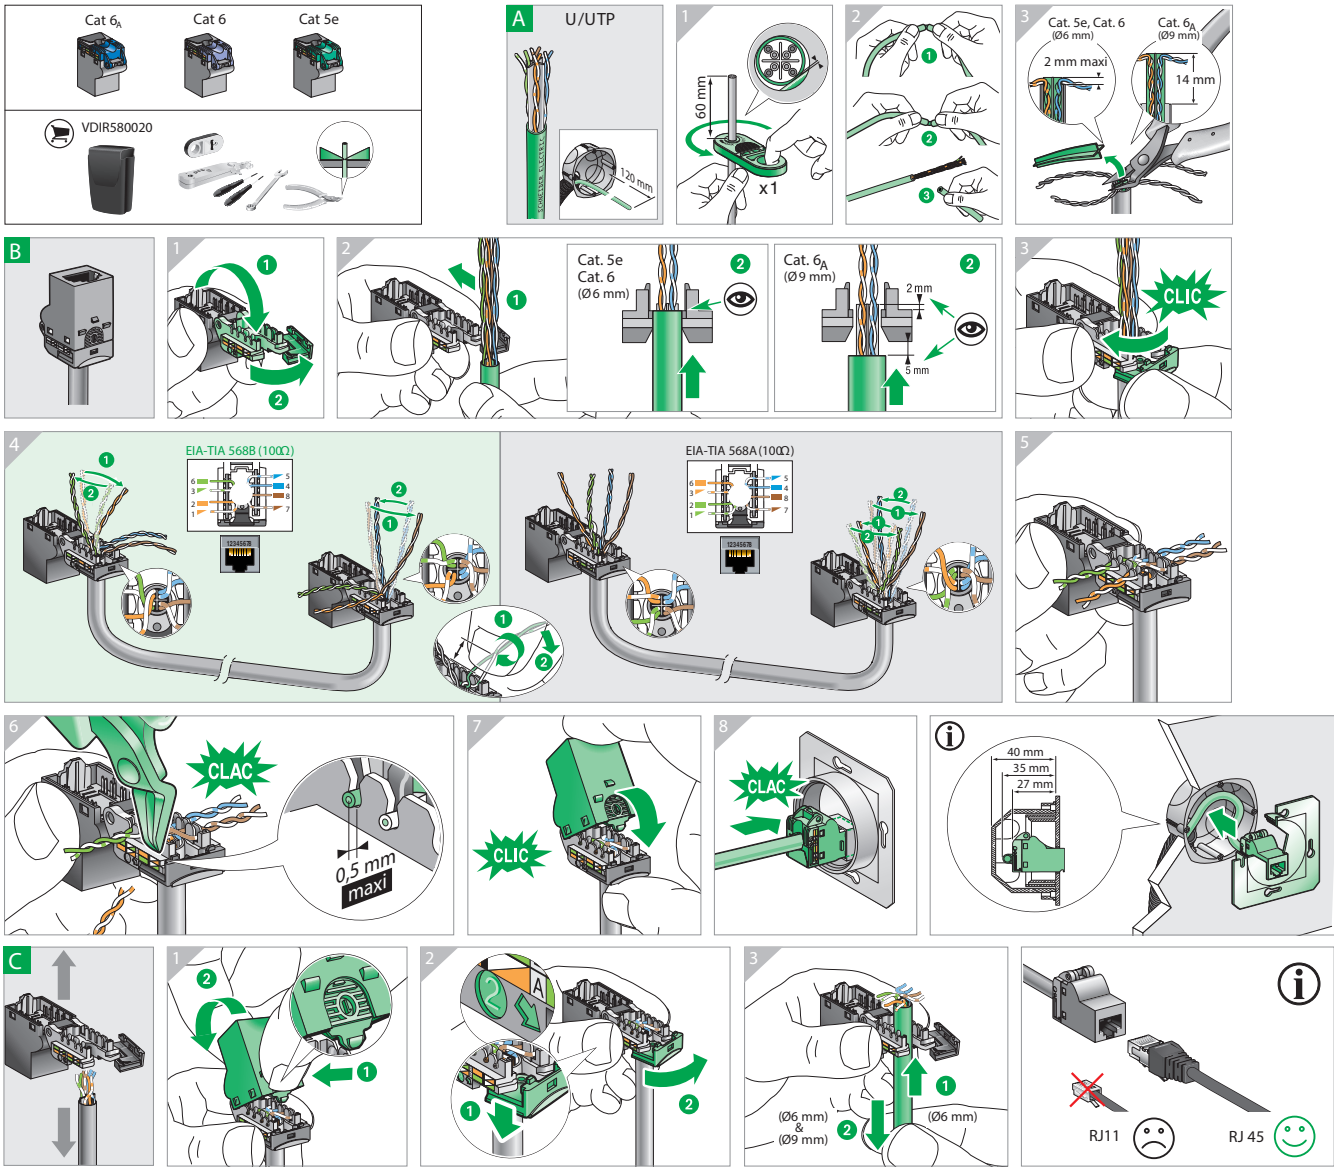


USB type A + C connection

Connections
RJ45 data sockets

Installation

Example of unshielded punch down data socket installation



Technical data

Categories

- The most important property defining a data network is the speed at which information can circulate inside this network.
- According to this aspect, installations are classed into the following categories

Category	Transmission rate	Network type
Cat. 3	Up to 10 MHz	Ethernet 10 Base T, Token Ring 4 Mbps
Cat. 4	Up to 16 MHz	Token Ring 16 Mbps
Cat. 5_E	Up to 100 MHz	Ethernet 1000 Base T, ATM 155 Mbps
Cat. 6	Up to 250 MHz	Ethernet 1000 Base T, ATM 1200
Cat. 6_A	Up to 500 MHz	Ethernet full-duplex mode 1000 Base T

Installation

Example of unshielded punch down data socket installation

Green Premium™

Endorsing eco-friendly products in the industry

Green Premium™
Product

Green Premium is the only label that allows you to effectively develop and promote an environmental policy whilst preserving your business efficiency. This ecolabel guarantees compliance with up-to-date environmental regulations, but it does more than this.

Over 75% of Schneider Electric manufactured products have been awarded the Green Premium ecolabel

Discover what we mean by green …

Check your products!

Schneider Electric's Green Premium ecolabel is committed to offering transparency, by disclosing extensive and reliable information related to the environmental impact of its products:

RoHS

Schneider Electric products are subject to RoHS requirements at a worldwide level, even for the many products that are not required to comply with the terms of the regulation. Compliance certificates are available for products that fulfil the criteria of this European initiative, which aims to eliminate hazardous substances.

REACh

Schneider Electric applies the strict REACh regulation on its products at a worldwide level, and discloses extensive information concerning the presence of SVHC (Substances of Very High Concern) in all of its products.

PEP: Product Environmental Profile

Schneider Electric publishes complete set of environmental data, including carbon footprint and energy consumption data for each of the lifecycle phases on all of its products, in compliance with the ISO 14025 PEP ecopassport program. PEP is especially useful for monitoring, controlling, saving energy, and/or reducing carbon emissions.

EoLI: End of Life Instructions

Available at the click of a button, these instructions provide:

- Recyclability rates for Schneider Electric products.
- Guidance to mitigate personnel hazards during the dismantling of products and before recycling operations.
- Parts identification for recycling or for selective treatment, to mitigate environmental hazards/ incompatibility with standard recycling processes.
